

## The Challenge

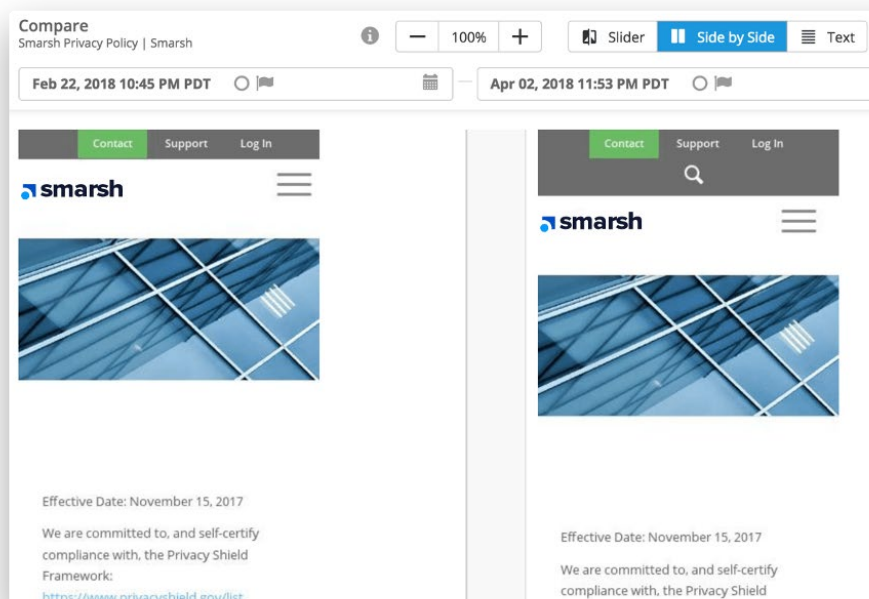

Your website is constantly changing. As part of a highly regulated and litigious industry, you need to keep track of these changes to safeguard your business. You need a solution that archives all updates to your website and provides you with an easy way to search for and produce records of these updates.

## The Solution

Web Archive is the premier solution for ensuring compliance with financial regulations. Be confident in your ability to capture any and all changes to your website. Additionally, increase the efficiency of your review teams with an easy-to-use UI and an archive that displays web pages as they are rendered in your browser. With advanced search and side-by-side web page comparison, you can quickly discover what has changed on your site and when.

## Key Benefits

- ✓ Meet regulatory requirements and internal policies
- ✓ Improve review effectiveness
- ✓ Maintain accurate, historical information
- ✓ Save time with a simple onboarding and user experience

## Key use cases

### Meeting compliance obligations

Preserve your web content to satisfy FINRA, SEC, FTC and additional regulatory requirements. Close your compliance gaps with the customizable capture of multiple web properties, including Vimeo, Trulia and more.

### Supervise and review website changes

Streamline your review process with purpose-built supervision workflows. Mark pages as reviewed, flag pages with violations for further review and add notes to specific pages.

Provide proof of supervision with a full audit trail of every action taken within the archive.

### Reporting

Gain insight into your data with rich reporting features.

### Conduct e-discovery and internal investigations

Find website data fast with powerful, granular search capabilities. View content as it originally appeared on websites with dynamic website reconstruction. Additionally, easily see how websites changed over time with advanced side-by-side page comparison features.

### Produce website records whenever and wherever you need them

Easily export your archived data in multiple formats, including PDF, JPG screenshots and text.
